Portfolio: juliansoto-portfolio.vercel.app/es

PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience specializing in TypeScript-based architectures and large-scale system modernization. Proven track record transforming critical COBOL/Db2 platforms into cloud-native, API-first solutions while delivering high-performance SaaS products. Expert in optimizing costs, scalability, and developer experience across the full stack.

TECHNICAL SKILLS

Frontend: React 19, Next.js 15, React Native, TypeScript, Tailwind CSS, React Native Reanimated 3

Backend: Node.js, PostgreSQL, MongoDB, Supabase, REST APIs, WebSocket

Legacy Systems: COBOL, Db2

Testing & QA: Playwright, Vitest, Jest

Cloud & DevOps: AWS, Vercel, CI/CD Pipelines

Tools: Git, Stripe, Web Audio API, XState, Expo, AsyncStorage

PROFESSIONAL EXPERIENCE

Senior Software Engineer – Soul Solutions | Buenos Aires, Argentina (2021–Present)

Led modernization of legacy banking systems (COBOL/Db2) into cloud-native architectures, reducing production incidents by 30% and improving delivery speed by 40% through CI/CD automation and strict TypeScript standards.

Senior Full Stack Developer – Independent Contractor | Remote (2020–Present)

Architected and delivered SaaS MVPs and interactive platforms including Bitrova and Bass Academy, featuring real-time synchronization, offline-first architecture, recurring task engines, and premium animated UI.

Technical Support Analyst – GV Comunicaciones | Buenos Aires, Argentina (2018–2020)

Managed network infrastructure, preventive maintenance, and operational data analysis, reducing downtime by 25%.

EDUCATION

Universidad Nacional de Quilmes – Bachelor of Computer Science (Ongoing)

CIMDIP & Miguel Cané – Secondary Education (2006–2014)
