PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience specializing in TypeScript-based architectures and large-scale system modernization. Strong background transforming mission-critical COBOL/Db2 platforms into cloud-native, API-first solutions. Proven record delivering high-performance SaaS products, optimizing cost, scalability, and developer experience.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, SQL, COBOL | Frameworks: React, Next.js, Node.js | Cloud and DevOps: CI/CD, Cloud Architecture, API Design | Databases: MongoDB, PostgreSQL, Db2 | Tools: Git, Stripe, Web Audio API

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer – Independent Contractor (2024–Present)

- Architected and delivered SaaS platforms serving international clients, improving feature delivery speed by 40 percent.
- Designed scalable React and Node.js systems with optimized rendering pipelines and API-first architecture.
- Implemented secure payment flows using Stripe and modern authentication strategies.

Senior Full Stack Developer – Soul Solutions (2020–2024)

- Led modernization of legacy COBOL/Db2 systems into real-time web platforms using REST APIs.
- Reduced production incidents by 30 percent through code reviews, testing strategies, and CI/CD adoption.
- Built internal dashboards enabling real-time visibility into enterprise data workflows.

Operations and Technical Analyst – GV Comunicaciones (2018–2020)

- Managed high-availability LAN and WAN infrastructure, improving incident response times by 25 percent.
- Applied Scrum-based workflows to streamline operational processes.

EDUCATION

Bachelor of Computer Science (in progress) – Universidad Nacional de Quilmes
